**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed on November 4, 2002 have been fully considered but they are not persuasive. Asano does disclose a plurality of corrugated fins each having a base extending laterally and longitudinally in a strip and a connecting member interconnecting the base and another one of the corrugated fins (see figure 10). Since the applicant does not state the criticality of having a connecting member that has a longitudinal length greater than a lateral width in the specifications or in the claims, one of ordinary skill in the art would find it obvious to construct the corrugated fins with a longitudinal length greater or less than the fins lateral width.

### ***Claim Rejections - 35 USC § 103***

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Asano et al. US Patent No. 5,078,207. Asano discloses a heat exchanger and fin for the same that does provide a plurality of corrugated fins (see figure 10) each having a base extending laterally and longitudinally in a strip and a connecting member interconnecting the base and another one of the corrugated fins, the connecting member having a longitudinal length greater than a lateral width thereof, and a plurality of offset louvers spaced along the base extending longitudinally and generally perpendicular to the base in an alternating manner, the offset louvers being rolled in a direction parallel to a longitudinal axis of the strip (see figure 10). Since the applicant does not state the criticality of having a connecting member that has a longitudinal length greater than a lateral width in the specifications or in the claims, one of ordinary skill in the art would find it obvious to construct the corrugated fins with a longitudinal length greater or less than the fins lateral width.

***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
